SUMMARY

Computer Science undergraduate at JECRC University specializing in AI & ML with strong foundations in Python, SQL, Machine learning, Data Structures & Algorithms and software development. Skilled in working with AI tools, performing data preprocessing, API Integration, and building end-to-end web applications integrating predictive models. Combines analytical thinking and problems solving skills with an interest in building reliable solutions for real-world challenges.

SKILLS

Languages: Python, SQL

Data & ML : Exploratory Data Analysis, Data Preprocessing, Feature Engineering, Supervised & Unsupervised Learning, Regression, Classification, Model Evaluation

Libraries & Frameworks: Pandas, NumPy, Matplotlib, Scikit-learn, TensorFlow, Next.js, FastAPI

Software Development: Backend Development, RESTful APIs, Git, SDLC

Tools & Platforms: GitHub, VS Code, Google Colab, Power BI, MySQL, Postman

Core CS: Computer Networks, DBMS, Operating Systems, Data Structures & Algorithms

EDUCATION

JECRC University

B.Tech in Computer Science (Specialization in AI & ML) | CGPA: 8.5

Jaipur, Rajasthan

July 2023 – July 2027 (Expected)

PROJECTS

Career Compass – AI-Powered Career Guidance | *Python, FastAPI, Next.js, Groq API [GitHub] (Jun 2026 – Aug 2026)*

- Engineered an end-to-end ML + GenAI application analyzing on 28 different parameters like technical, project, and career-preference attributes to deliver personalized career recommendations.
- Built a complete ML pipeline encompassing synthetic data generation, data validation, data cleaning, preprocessing, feature engineering, model training, evaluation, and serialized inference, served through FastAPI.
- Integrated Groq-powered GenAI to transform ML predictions into personalized reports, career paths, skill gaps, courses, projects, and certifications.
- Developed interactive frontend components for student assessment and visualization of prediction results, connecting the UI with the backend, enabling users to receive personalized career guidance through a unified web application..

TruePixel – Deepfake Detection System | *Python, TensorFlow, OpenCV, FastAPI [GitHub] (Feb 2026 – Apr 2026)*

- Developed a modular end-to-end deepfake detection application by integrating computer vision, backend services, and machine learning pipelines for automated image and video analysis.
- Designed and implemented RESTful APIs using FastAPI for real-time prediction, confidence scoring, and result management, enabling seamless communication between frontend and backend components.
- Collaborated within a 3-member development team using Git-based version control to integrate model inference, backend services, and user-facing modules while improving code maintainability and achieved 80% detection accuracy.

CERTIFICATIONS

Python for Everybody | *University of Michigan (Coursera)* (Feb 2026)

Machine Learning with Python | *IBM (Coursera)* (Apr 2026)

Carrer Skills in Software Development | *Linkedin Learning* (Jan 2026)

Software Development Life Cycle | *Linkkein Learning* (Sep 2025)

Become a Data Scientist | *LinkedIn Learning* (Jun 2025)

AI Fluency: Framework & Foundations | *Anthropic* (Aug 2025)

ACHIEVEMENTS & TECHNICAL ENGAGEMENT

- Secured Top 10 position in the university-level Smart India Hackathon (SIH) 2025 selection round.
- Solved 200+ Data Structures & Algorithms problems on LeetCode, strengthening problem-solving and programming skills.

LEADERSHIP & POSITIONS OF RESPONSIBILITY

Co-Founder, JUCA (JECRC University Cricket Association)

- Co-founded and led a student sports club to promote cricket and organize sporting activities across the university.
- Organized and coordinated cricket and kabaddi matches by managing event logistics, volunteers, and student participation involving 100+ participants.
- Actively participated in university cricket events while promoting teamwork and student engagement through JUCA initiatives.
